

**Ac♦T 8™ / Ac♦T diff™****Function**

The reagent management card contains essential operational information using smart card technology. Smart card technology is used to confirm the compatibility between the analyzer and reagent system in use. Each reagent configuration comes with a matched reagent management card.

**Technical data**

- ☐ Microcontroller 8-bit RISC made in EU
- ☐ ISO 7816 compatibility
- ☐ Power Supply: 5V 10%
- ☐ Power Consumption (max): 2.5mA
- ☐ Dimensions: 90mm x 53.98mm x 0.76mm
- ☐ Operation Range: 0-70 C
- ☐ Data retention time: 90 years
